EXPERT PREPARATION & APPLICATION

CUSTOM PRODUCTS BUILT FOR YOUR NEEDS

Mission Statement, FloorTech Concrete Coatings installs beautiful and durable concrete floor coatings for residential and commercial clients who seek a healthier and safer flooring solution to increase the usable square footage of their space. While most of our installations are done in one day, our solutions and relationships last a lifetime.

STEP 1 PREPARATION

Preparation includes shot blasting and/or diamond grinding. Dust is minimized by having all grinders hooked up to vacuum systems.

STEP 4 BROADCASTING THE CHIP

Immediately after the basecoat application, the chip is generously broadcast by hand, providing both color and texture to the floor.

STEP 2 CONCRETE RECONSTRUCTION

Our award winning menders and fillers are used to fix pits and cracks before the process begins.

STEP 5 SCRAPING THE CHIP

Once the basecoat is fully cured the floor is scraped and vacuumed to remove any loose or vertical standing flakes.

STEP 3 BASECOAT

100% solids, self-priming pure polyurea base coat is mixed and applied.

STEP 6 CLEAR COAT

The final step is to roll out the UV stable polyaspartic clear coat.

VALUED FEATURES

EXCEPTIONAL VALUE FOR DECADES OF DURABILITY

- + **Customizable styles**, including chip, metallic, quartz, and solid color options
- + **Safety-enhancing textures** that can prevent slips and falls in the garage
